Disclaimer

We can honestly say that here at **Garden Slippers** we have never killed a single plant. They all committed suicide. Of course, this is far from truth, losing plants is part of growing plants. Despite our best efforts we sometimes have losses. We are always willing to share our experiences with growing slippers – the good, the bad, and the ugly. We want people to have success. We want our customers to fall in love with these plants like we have.

Unfortunately, **Garden Slippers** cannot offer a warranty but we can guarantee that every rhizome is checked for health and confirmed to have viable eyes (dormant buds).

If you have any questions or concerns about your shipment, you must email us within 48 hours of receipt of your plants. Please include a few digital photos, if possible. Digital photos will help us to diagnose the problem and devise an effective solution. If you do not contact us within 48 hours then a problem that could have been corrected becomes one that is beyond our control and responsibility.

Frosch® Exclusive Perennials

Grown outside with organic plant protection therefore vigorous and healthy.

Frosch® Rhizome Size Guide

The rhizome size for each Frosch® orchid in this catalogue is displayed at the end of its name (e.g., Anna 0, Henric 1, etc.).

Due to the growth habit of the guttatum hybrids and clones we are offering single growth divisions of each selection. As a result, these will only be available as size 1. These are dwarf plants so expect the rhizomes to be small compared to other mature selections.
